

Kommit

Role: Patent Analyst (Engineering or Science background)

Company: Kommit Techno-Legal LLP

Type: Full time at New Delhi office (non-remote)

Application method: Email careers@kommit.com.

Requirements:

- **Qualification:** Bachelor's degree in a science or engineering discipline with working knowledge of electronics;
- **Availability:** Immediate.

Job skills: Experience with patents with working knowledge of electronics engineering, proficiency in Microsoft Powerpoint, Excel and Word, Google Apps (Drive, Gmail, Calendar etc.) critical thinking and problem-solving ability, research skills, writing skills and communication skills.

Description: This role involves researching for and preparing technical documentation relating to patent infringement and invalidation. The role requires critical thinking ability along with research skills, technical knowledge and problem solving abilities. Working knowledge of electronics is required but a qualification in electronics is not mandatory. You should be comfortable with tackling technical material and understanding the basic legal concepts related to patents.

Types of work you may be asked to undertake:

- Drafting patents, forms and drawings;
- Reading and understanding a patent;
- Conducting prior art searches;
- Researching potential infringers and infringement;
- Preparing claim charts;
- Drafting notes, reports, briefs, memos and presentations.

About Kommit: Kommit is an intellectual property consultancy specialising in technical consultancy for patent litigations. Find out more at www.kommit.com.
